RE: Peco Gas Main Replacement Project – Summer 2025

Based on feedback at our May 21, 2025, meeting, the Borough has contacted PECO and successfully secured its commitment to engage in more direct communication regarding the upcoming State Street Gas Main Project. This effort will create an opportunity for the Borough and local stakeholders to ask questions and receive detailed answers directly from PECO about all aspects of the project.

Currently, PECO is in the process of finalizing required PennDOT Road Occupancy Permits. Once those permits are approved, PECO will be in a better position to provide a projected schedule and offer clear information on what businesses and residents can expect during the course of the project.

To support this communication, the Borough is working with PECO to coordinate an opportunity for public engagement, with the format and timing to be determined.

We appreciate everyone's patience and will continue to provide updates as they become available.
